

Yazdan Zandiye Vakili

Software Engineer | Java Backend Engineer

Vienna, Austria

+43 677 629 19854 yazdanzv.1378@gmail.com Website LinkedIn GitHub Google Scholar

PROFESSIONAL SUMMARY

Software Engineer with nearly two years of experience developing **enterprise backend applications using Java and Spring Boot** in Austria. Experienced in REST APIs, microservices, SQL databases, Docker, Redis, **distributed caching and backend modernization**. Strong foundation in **distributed systems, backend architecture, and performance optimization**, with previous experience developing high-performance financial software.

WORK EXPERIENCE

- Workflow GmbH | Software Engineer (Previously Software Engineering Intern)** Sep 2024 – Present
Vienna, Austria
 - Develop **enterprise HR software** used by large international organizations, including Mercedes-Benz and Raiffeisen, using **Java and Spring Boot**, Hibernate, REST APIs, MySQL, PostgreSQL, and Microsoft SQL Server.
 - Designed and implemented a **two-tier caching system** with Caffeine as the local cache and Redis as the shared distributed cache, improving backend performance and reliability.
 - Contributed to **backend modernization** through migration from **Java 8 to Java 17**, Spring, Spring Boot, and Hibernate upgrades, dependency updates, and API adaptations required by upgraded libraries.
 - Develop backend features, improve maintainability and reliability, contribute to **architecture and technical design discussions**, and review pull requests.
 - Support delivery and monitoring with **Docker, Jenkins, Grafana, and JavaMelody**, with brief exposure to ActiveMQ-based messaging.
- Karyar College | Teaching Assistant, Tutor & Course Supervisor** Jul 2020 – Present
Tehran, Iran
 - Teach and mentor students in **Python, Django backend development, REST APIs, and SQL** as a Teaching Assistant, tutor, and course supervisor.
 - Deliver programming workshops covering **data analysis with Pandas and NumPy**, socket programming, and object-oriented programming.
- Tadbir Pardaz Company | Part-time Backend Developer** Dec 2022 – Dec 2023
Tehran, Iran
 - Developed backend functionality with **ASP.NET and C#** in a microservice architecture and worked with RabbitMQ for service messaging.
 - Configured **Confluence** and documented code and system knowledge to support team collaboration and maintainability.
 - Collaborated in a **Scrum team using Azure DevOps** for task tracking and software delivery.

TECHNICAL SKILLS

- Programming Languages:** Java, Python, JavaScript, C#, C++
- Backend:** Spring Boot, Spring Framework, Hibernate, JPA, REST APIs, Microservices, Django
- Databases & Caching:** PostgreSQL, MySQL, Microsoft SQL Server, Redis, Caffeine
- Messaging:** RabbitMQ, ActiveMQ, Apache Kafka
- DevOps & Monitoring:** Docker, Jenkins, Grafana, JavaMelody, Git, Linux
- Frontend:** React, HTML, CSS
- Software Engineering:** Distributed Systems, System Design, Object-Oriented Design, Design Patterns, Concurrent Programming, Performance Optimization, Code Reviews, Agile (Scrum)

EDUCATION

University of Tehran

Bachelor of Computer Science

- GPA: **17.6/20 (3.7/4)**

Tehran, Iran

Sep 2018 – Jan 2024

HONORS AND AWARDS

- Faculty of Engineering Top Student of the Year (the FOE Award) | [View Certificate](#)

Sep 2019

LANGUAGES

- Persian (Native)
- English (Professional – **IELTS Overall 8.0** | [View Certificate](#))
- German (A2 – Elementary)
